

Dedicated Contract Carriage Solutions DCC Lite

Leveraging Ryder's expertise to provide a streamlined transportation solution.

CUSTOMIZED SOLUTIONS WITHOUT
THE INVESTMENT OF OPERATING A
PRIVATE FLEET

Ryder's *Dedicated Contract Carriage Solutions* enable you to leverage Ryder's transportation expertise and infrastructure. Ryder offers you a comprehensive solution of professional drivers, vehicles, maintenance and road services, on-time pick-up and delivery, fuel consumption and safety management, administrative and management support services at an all inclusive predictable cost.

Overview

Ryder's DCC LITE solution is one offering within Ryder's overarching umbrella of Dedicated Contract Carriage Solutions. DCC LITE is a turnkey transportation service for your company that assures a steady stream of raw materials and components for manufacturing and assembly plants, and enables timely, safe and professional delivery of your finished products. From operations management, safety programs, regulatory compliance and assistance with risk management, it is a complete package that is designed and operated to your precise specifications.

Dedicated Contract Carriage Solutions are typically used when companies have:

- ▶ Low tolerance for timing failures.
- ▶ On-time professional delivery requirements.
- ▶ Product sequencing needs.
- ▶ Just-in-time manufacturing.
- ▶ Product spoilage issues.
- ▶ High touch freight.
- ▶ A large concentration of deliveries or pick-ups in close proximity of origin.

Benefits

Just-in-time pickup and delivery facilitates smooth material flow into manufacturing and assembly plants by providing on-time, sequenced deliveries to dock locations from hundreds of component suppliers. This enables you to reduce inventory investment, improves cash flow and increases your ability to meet your customers' needs.

Quick response delivery means faster cycle times as companies move from a supply based 'push' system to a demand based 'pull' system.

As a special feature, Ryder also provides unattended delivery, where drivers make deliveries during off hours to reduce lead times and maximize equipment utilization.

Dedicated Contract Carriage Solutions provide:

- ▶ Asset transition and/or disposal.
- ▶ Improved cost control with predictable monthly expenses.
- ▶ Reduction in administrative services by consolidating compensation, safety programs and licensing.
- ▶ Risk and liability reduction.
- ▶ Best-in-class driver hiring and training.

Two Solutions; One Provider

Depending on the size and complexity of your fleet, Ryder's operation will tailor a streamlined transportation solution (DCC LITE) or we can provide a more comprehensive turnkey solution involving logistical engineering, design and more complex support services (DCC PLUS).

The chart below details the differences between the LITE and PLUS service offerings. Depending on your company needs and requirements, you can benefit from the different levels of these solutions. Your Ryder representative can explain each service in detail to help you make an informed decision as to which option makes the most sense for your business.
