RYDER MULTI-CLIENT OPTIMIZATION NETWORK

Now, Single Source Inventory

Deployment Is At Your Command.

Now you can get all the inventory and distribution services you need. From one source. Without investing in expensive facilities, equipment and staff. All backed by the quality and experience of a world leader in transportation and logistics. It's Ryder's Multi-Client Optimization Network, but you can think of it as your own consolidation, warehousing and distribution resource.

No Big Overhead. No Big Investment. Just Big Savings.

Ryder's multi-client facilities are unique because they aren't dedicated to any one customer's situation, schedule or requirements. They are designed around a shared services concept that allows seamless integration into just about any operation for any number of customers. This consolidation of services assures no single customer is faced with big overhead costs and expensive facilities investments. Instead, everyone shares substantial savings without sacrificing the services they need.

Without high overhead costs and staff salaries, you can free-up capital that can be used to grow your business. You'll also be free from the grueling day-to-day responsibilities of managing an inventory and distribution system. And Ryder's multi-client facilities can actually help increase customer satisfaction, by providing the on-time, reliable delivery your customers demand. Every day.

Around the clock.

A Variety Of Solutions To Meet Your Inventory Needs.

Whatever you need, Ryder can furnish. Pool distribution. Freight consolidation. Warehousing. Flow-through and cross-docking. Order fulfillment. Pick and pack. Replenishment. Light assembly. Dedicated fleet and driver. Line haul, regional runs and local deliveries. Our multi-client facilities include administrative services, Driver Recruitment Centers (DRCs) and carrier and freight management capabilities. Additionally, in some areas we offer service to nearby ports. You'll find it all at Ryder's Multi-Client Optimization Network, along with the flexibility you need to customize services to meet all your inventory, warehousing and distribution requirements.

At Ryder, we work on your timetable. We meet your delivery schedule. We adjust our services to fit your distribution requirements. And we can help do it with next day delivery. The results: Increased efficiency, lower costs and improved customer satisfaction.

Our Advanced Technology Speeds Your Goods To Market.

We begin with bar code based inventory scanning and tracking technology and continue with state-of-the-art handling equipment and electronic data interchange (EDI). But, it doesn't stop there. Our commitment to customer service includes the use of many other Ryder technologies — all designed to speed your goods to market.

Our sophisticated distribution management system controls cross-docking, warehousing and distribution functions to help you gain faster cycle times, reduce inventory levels, eliminate stockouts and improve order fill rates. And we keep you informed with numerous Information Management reports so you can continually increase efficiency and improve profitability.

1 Delivery
