- **100%** visibility
- **99%** inventory accuracy
- **99%** on-time delivery
- **800+** maintenance facilities across North America
- **343K** annual cross border freight movements

Built for the Automotive Supply Chain

Ryder supports automotive companies with solutions tailored for:

- OEM and supplier distribution
- Parts & component delivery
- Finished vehicle logistics
- Aftermarket fulfillment
- Just-in-time (JIT) & just-in-sequence (JIS) operations
- Production changeovers & surges
- High-touch, multi-stop, and time-definite deliveries

RYDER PORT2DOOR™ CAPABILITIES FOR AUTOMOTIVE

Ryder's automotive solutions have delivered millions in savings, improved inventory accuracy, and strengthened complex cross-border supply chains. Our tech-forward capabilities let you gain greater visibility and control from port to finished vehicle logistics.

Inbound Logistics & Port Operations

Keep inventory and critical components flowing efficiently from ports to assembly plants and distribution centers with integrated drayage, cross-border transportation, cross-docking, and transloading solutions designed to minimize delays and support continuous production.

Warehousing & Distribution

Optimize inventory flow with dedicated and shared warehousing solutions engineered to enhance flexibility, throughput, and inventory accuracy. Ryder supports automotive operations through warehouse automation, facility design, process engineering, and continuous improvement initiatives. Our LEAN capabilities, scalable distribution network, and value-added services—including kitting, subassembly, and quality inspection—streamline operations while boosting speed and reliability. Backed by a nationwide network of drivers, technicians, facilities, and transportation assets, Ryder delivers the scale and expertise needed to keep your supply chain moving.

Kitting & Assembly

Accelerate speed to market and streamline production with Ryder's kitting and assembly value added services. From component sourcing and subassembly to packaging and final delivery, Ryder provides scalable solutions designed to support automotive brands at every stage of growth.

Technology Platforms

Ryder combines advanced warehouse management technology enabled by AI with real-time transportation visibility. Our warehouse management systems (WMS) help optimize inventory control, labor efficiency, order processing, and fulfillment across dedicated and shared warehouse environments. RyderShare™, our dynamic digital platform, provides real-time shipment visibility, exception management, collaboration, and supply chain insights to help automotive companies respond faster, improve communication, and drive smarter operational decisions.

Dedicated Transportation

Gain the benefits and control of a private fleet without the burden of managing one. Ryder Dedicated Transportation provides professional drivers, vehicles, maintenance, routing, safety oversight, and operational management designed to improve reliability, reduce risk, and support consistent on-time delivery to your plants and partners.

Transportation Management

Optimize your transportation network with Ryder's managed transportation solutions powered by expert carrier procurement, tailored shipment planning & execution, financial settlement, and AI-enabled analytics. Ryder helps improve service levels, increase efficiency, and create greater control across complex automotive transportation operations.

Freight Brokerage

Access flexible capacity through Ryder's network of over 120,000 vetted carriers supported by advanced technology, shipment visibility, and transportation expertise. Ryder Freight Brokerage helps automotive companies respond quickly to production shifts, demand surges, and time-sensitive shipments while maintaining service standards.

Fleet Leasing & Maintenance, Rental, Used Vehicle Sales

Improve fleet uptime and operational flexibility with commercial truck leasing with built-in maintenance, truck rental, and used vehicle sales backed by one of the largest maintenance networks in North America. From planned growth to production spikes and replacement vehicles, Ryder helps keep your fleet moving.

Perfect the Automotive Supply Chain Your Customers Depend On

Whether you need support managing transportation, warehousing, fleet operations, or the complete port-to-door journey, Ryder delivers the scale, expertise, technology, and operational support to help automotive companies move with speed and confidence. Visit ryder.com to learn more.
