

RYDER PORT2DOOR™ SOLUTIONS FOR INDUSTRIAL MANUFACTURING

From the port to your customer's door, Ryder helps industrial manufacturers optimize transportation, warehousing, distribution, and final delivery with integrated supply chain solutions engineered for speed, visibility, and reliability.

Industrial manufacturing supply chains face relentless pressure from tight production schedules, global sourcing complexities, fluctuating demand, and the need for real-time visibility. Ryder Port2Door™ Solutions connect every stage of your supply chain with integrated warehousing, transportation, fleet management, and advanced technology solutions tailored to your business. With decades of experience serving world-class manufacturers across sectors such as heavy equipment, machinery, and raw materials, our proven solutions drive efficiency, precision, and agility.

Why Ryder for Industrial Manufacturing?

- End-to-end port-to-door transportation, cross-border, & logistics solutions
- Dedicated & shared warehousing solutions
- Warehousing & fulfillment capabilities
- Dedicated transportation, transportation management, & freight brokerage
- Commercial truck leasing with built-in maintenance, rental, & used vehicle sales
- Contract packaging, kitting & assembly
- Warehouse automation & real-time visibility powered by RyderShare™
- Scalable support for production surges & changing demand
- Nationwide network of drivers, technicians, facilities, & transportation assets
- Expertise in aerospace, agrichemicals, building materials, chemicals, HVAC, metals, lumber, tire manufacturing, and heavy equipment
- Trusted Across All Major Industrial Sectors:
 - Aerospace
 - Agrichemicals
 - Building Materials & Construction
 - Chemicals
 - HVAC
 - Metals
 - Lumber
 - Tire Manufacturing
 - Heavy Equipment

Ryder By the Numbers

- Decades of experience in industrial manufacturing logistics
- **100M+** sq. ft. of warehouse space managed
- **13,000+** professional drivers
- **\$10B** freight under management
- **100%** visibility
- **99.4%** inventory accuracy
- **99%** on-time delivery
- **800+** maintenance facilities across North America

Built for the Industrial Supply Chain

Ryder supports industrial manufacturers with solutions tailored for:

- Raw materials and component distribution
- Machinery and equipment delivery
- Production line supply and sequencing
- Aftermarket parts fulfillment
- Just-in-time (JIT) & just-in-sequence (JIS) operations
- Production changeovers & surges
- High-touch, multi-stop, and time-definite deliveries

RYDER PORT2DOOR™ CAPABILITIES FOR INDUSTRIAL MANUFACTURERS

“Ryder is an extension of our business. They provide us with a distinct set of resources that helps us stand apart. Ryder knows and plans for trends before they happen. They provide us with the personnel we need. They put our customers first.”

— Jonas Imperial, Director of Transportation, Lennox

Inbound Logistics & Port Operations

Keep inventory and critical components flowing efficiently from ports to manufacturing plants and distribution centers with integrated drayage, cross-border transportation, cross-docking, and transloading solutions designed to minimize delays and support continuous production.

Warehousing & Distribution

Optimize inventory flow with dedicated and shared warehousing solutions engineered to enhance flexibility, throughput, and inventory accuracy. Ryder supports industrial manufacturing through warehouse automation, facility design, process engineering, and continuous improvement initiatives. Our LEAN capabilities, scalable distribution network, and value-added services—including parts kitting, subassembly, and quality inspection—streamline operations while boosting speed and reliability. Backed by a nationwide network of drivers, technicians, facilities, and transportation assets, Ryder delivers the scale and expertise needed to keep your supply chain moving.

Kitting & Assembly

Accelerate speed to market and streamline production with Ryder’s kitting and assembly value-added services. From component sourcing and subassembly to packaging and final delivery, Ryder provides scalable solutions designed to support industrial manufacturers at every stage of growth.

Technology Platforms

Ryder combines advanced AI-enabled warehouse management technology with real-time transportation visibility. Our warehouse management systems (WMS) help optimize inventory control, labor efficiency, order processing, and fulfillment across dedicated and shared warehouse environments. RyderShare™, our dynamic digital platform, provides real-time shipment visibility, exception management, collaboration, and supply chain insights to help industrial manufacturers respond faster, improve communication, and drive smarter operational decisions.

Dedicated Transportation

Gain the benefits and control of a private fleet without the burden of managing one. Ryder Dedicated Transportation provides professional drivers, vehicles, maintenance, routing, safety oversight, and operational management designed to improve reliability, reduce risk, and support consistent on-time delivery to your plants and partners.

Transportation Management

Optimize your transportation network with Ryder’s managed transportation solutions powered by expert carrier procurement, tailored shipment planning & execution, financial settlement, and AI-enabled analytics. Ryder helps improve service levels, increase efficiency, and create greater control across complex industrial transportation operations.

Freight Brokerage

Access flexible capacity through Ryder’s network of over 120,000 vetted carriers supported by advanced technology, shipment visibility, and transportation expertise. Ryder Freight Brokerage helps manufacturers respond quickly to production shifts, demand surges, and time-sensitive shipments while maintaining service standards.

Fleet Leasing & Maintenance, Rental, Used Vehicle Sales

Improve fleet uptime and operational flexibility through commercial truck leasing with built-in maintenance, truck rental, and used vehicle sales, backed by one of the largest maintenance networks in North America. From planned growth to production spikes and replacement vehicles, Ryder helps keep your fleet moving.

Perfect the Industrial Manufacturing Supply Chain Your Customers Depend On

Whether you need support managing transportation, warehousing, fleet operations, or the complete port-to-door journey, Ryder delivers the scale, expertise, technology, and operational support to help industrial manufacturers move with speed and confidence. Visit ryder.com to learn more.
