

RYDER PORT2DOOR™ SOLUTIONS FOR RETAILERS

From the port to your customer's door, Ryder helps retailers optimize inbound logistics, warehousing, fulfillment, transportation, and final delivery with integrated supply chain solutions built for agility, visibility, and reliability.

Retail supply chains have to move at the speed of the customer—across stores, e-commerce, wholesale, and direct-to-consumer channels—while navigating seasonal peaks, labor constraints, inventory complexity, and rising service expectations. Ryder Port2Door™ Solutions connect every stage with integrated warehousing, transportation, fulfillment, fleet management, and technology customized to your needs.

Trusted by more than 300 retailers from apparel and consumer electronics to furniture, grocery, and auto parts, Ryder brings proven retail expertise and scalable solutions designed around your operation. Our network, trained workforce, continuous improvement approach, and proprietary technology & automation help increase efficiency, improve visibility, and keep products moving when and where customers expect them.

Ryder retail customers, have achieved 100% on-time delivery, 99.87% order accuracy, a 27% productivity increase through automation, and 100% real-time load visibility. For one retail operation, reverse logistics auditing saved \$2 million in product incorrectly sent to salvage in a single week.

- Consumer electronics

RYDER PORT2DOOR™ CAPABILITIES FOR RETAIL

“We made an effort to ask for recommendations from different brands and our advisory group to see which providers came out on top. Ryder was the name that kept cropping up in those discussions.”

— Scott Dulaney, Chief Operating Officer, Mugsy

Inbound Logistics & Port Operations

Keep products moving efficiently from ports and suppliers to distribution centers, fulfillment centers, and stores with integrated drayage, cross-border transportation, cross-docking, and transloading solutions designed to reduce delays and improve flow.

Warehousing & Distribution

Optimize inventory flow with dedicated and shared warehousing solutions designed to improve flexibility, throughput, and accuracy. Ryder supports retail operations with facility design, LEAN process engineering, automation, value-added services, reverse logistics, and continuous improvement. Integrated technology delivers actionable visibility and helps retailers adapt quickly as demand shifts.

E-commerce & Omnichannel Fulfillment

Create a consistent customer experience across direct-to-consumer, retail, and wholesale channels. Ryder combines strategically located fulfillment centers with inventory management, order fulfillment, pick-and-pack, value-added services, shipping, and returns management. Scalable operations flex for peak volumes, promotions, seasonal surges, and long-term growth.

Technology & Automation

Ryder combines proprietary platforms such as RyderShare™, RyderShip™, and RyderGyde™ with warehouse automation to deliver real-time visibility, collaboration, analytics, and exception management. After researching more than 350 technologies since 2021, our teams apply automation where it creates value. In one retail deployment, automation increased productivity by 27%.

Dedicated Transportation

Gain the benefits and control of a private fleet without the burden of managing one. Ryder Dedicated Transportation provides professional drivers, right-sized vehicles, maintenance, routing, scheduling, safety oversight,

analytics, and operational management designed to improve reliability and support consistent direct-to-store delivery—even through seasonal peaks.

Transportation Management

Unify your transportation network through a centralized control tower with end-to-end visibility. Ryder combines carrier procurement, network design, route engineering, scheduling, freight bill audit and payment, and technology tools to help improve service and control costs. Access to 120,000 qualified carriers helps provide capacity across complex retail networks.

Last Mile Delivery

Extend your retail experience to the customer's door with integrated last mile delivery. Ryder helps retailers connect warehousing, e-commerce fulfillment, transportation, and final delivery into a more seamless network, with scalable support for high-touch products such as furniture, appliances, and other large or complex deliveries.

Fleet Leasing & Maintenance, Rental, Used Vehicle Sales

Improve fleet uptime and operational flexibility with commercial truck leasing with built-in maintenance, truck rental, and used vehicle sales backed by one of the largest service networks in North America. Ryder ChoiceLease offers better than 95% uptime and access to 5,000+ qualified technicians at nearly 800 shops, while rental capacity helps retailers respond to peaks, growth, and unexpected needs.

Perfect the Retail Supply Chain Your Customers Depend On

Whether you need support managing transportation, warehousing, fulfillment, fleet operations, or the full port-to-door journey, Ryder delivers the scale, expertise, technology, and operational support to help retailers move with agility, improve visibility, and serve customers with confidence.
