

CARRIER SELECTION MATTERS MORE THAN EVER

On May 14, 2026, the Supreme Court issued its unanimous decision in the Montgomery v. Caribe case. It held that negligent hiring claims against brokers are not blocked by federal law and may proceed in state court.

It is more important than ever for customers to have confidence in their providers' carrier vetting process. Ryder has always held its carriers to a higher standard in which safety, reliability, and compliance is key. Ryder Transportation Management combines disciplined carrier qualification, operational oversight, AI-driven monitoring, and one of the largest transportation networks in North America to help customers move freight with greater confidence, reliability, and control.

Disciplined Carrier Selection & Oversight

Ryder's carrier vetting standards go above and beyond industry requirements and are more selective than other providers in the market.

Safety & Compliance

- No "Conditional" FMCSA Safety Ratings
- Non-Domiciled Drivers Not Permitted
- Secondary Safety Review Processes
- Ongoing Compliance Monitoring

Operational Legitimacy

- 180-Day Minimum Continuous Operating Authority Requirements
- Verification of Digital & Physical Operational Footprints
- Asset Utilization & Operational Legitimacy Reviews

Fraud Prevention

- Double-Brokering Prevention Controls
- Chameleon and Suspicious Activity Monitoring
- Insurance & Factoring Relationship Reviews

Performance Monitoring

- Carrier Scorecards
- Daily Performance Monitoring
- AI-Driven Carrier Insights & Performance Models
- Real-Time Market Intelligence

What Makes Ryder TM Different?

Ryder Transportation Management is fundamentally different from a traditional brokerage model. Our managed transportation approach is designed to optimize the overall transportation network and customer outcome. We combine transportation expertise, rigorous carrier qualification standards, operational oversight, and technology-enabled visibility to help customers improve safety, service consistency, and network reliability.

Helping Customers Navigate a Changing Transportation Market

As transportation markets evolve, many companies are reevaluating how transportation providers manage carrier qualification, operational oversight, and network risk. Ryder Transportation Management helps customers:

- Improve transportation reliability
- Strengthen operational oversight
- Reduce network disruption
- Gain visibility across shipments and carriers
- Access dependable capacity across modes and markets
- Balance safety, service, and cost efficiency
